Module 2: Angular Components and Data Binding

Assignment 1 – Creating a new employee component

edureka!

edureka!

Assignment – 1:

Problem Statement

Create a new Employee List component which includes below fields in table format.

•   Employee ID

•   First Name

•   Last Name

•   Dept

•   City

•   Email

Follow the steps below to build the application:

1. Create new Angular app by using command 'ng new {AppName}'

2. Create new component using the command 'ng generate component {ComponentName}'

3. After removing all the existing code in app.component.html file, add the selector of the new component

4. In the employee.component.html, add the code to create the table with the above fields

5. Make use of Bootstrap to design the application

After building the application, prepare a ZIP file of the application code and upload it on LMS in Assignment solution section for evaluation.
